EXPERIENCE

Senior Software Engineer

2025 - Present

Walmart

Bentonville, AR

- Architected and led development of an enterprise AI platform supporting inventory operations across 5,000 locations, reducing inventory lookup time by 20% while owning deployment and production support.
- Designed distributed data solutions across Cassandra, Cosmos DB, and Azure services, reducing annual infrastructure costs by \$400K+ while improving application performance and system scalability.
- Implemented monitoring and operational dashboards covering 15+ production services, improving incident visibility and reducing troubleshooting time by 30%.
- Automated and optimized distributed workflows across Cosmos DB and GCP services, reducing end-to-end pipeline latency by 42%, eliminating manual processing, and improving production reliability.
- Mentored 2 software engineers through architecture reviews, code reviews, and technical coaching while establishing engineering standards adopted across the team.

Software Engineer - Cloud

2023 - 2025

Intel

Chandler, AZ

- Optimized Kafka workload for client, doubling throughput while reducing CPU utilization by 20%.
- Improved compression workloads for clients, achieving a 12x increase in compression pipeline speed.
- Automated CI/CD pipeline and environment provisioning using Docker and Terraform; contributed to GitHub Actions workflows across AWS, Azure, and GCP.
- Ensured all systems were vulnerability-free while reducing cloud costs by 6% year over year.

Software Engineer - Media Processing

2021 - 2023

Intel

Chandler, AZ

- Automated benchmarking and data collections to improve efficiency by 500%.
- Performed media analysis across various cloud/physical machines and optimized bottlenecks upwards of 80%.
- Designed backend and dashboards enabling real-time performance visibility for customers and internal teams.
- Led a team of engineers and stakeholders to deliver competitive media analysis.

Software Engineer

2019 - 2021

Intel

Chandler, AZ

- Assembled various Python and Bash scripts for machine fab automation.
- Visualized data for error analysis with tools such as Plotly, and Tableau, reducing issue resolution time by 70%.

Software Engineering Intern

2019

American Express

Scottsdale, AZ

- Redesigned data infrastructure, enabling 2 teams with seamless data integration.
- Administered Kubernetes cluster for data handling and uptime across financial domain systems.

Software Engineering Teaching Assistant

2019

Arizona State University (CSE 340)

Tempe, AZ

SKILLS

Languages Python (6+yrs) Java (3+yrs) Bash React C/C++ Javascript

Cloud/DB AWS, GCP, Azure, Terraform, Ansible, Docker, Kubernetes, Elasticsearch, Cassandra, Cosmos DB

DevOps Git, GitHub Actions, CI/CD, Kafka, Linux, REST APIs, Microservices

EDUCATION

Arizona State University, Ira Fulton School of Engineering

Master of Computer Science

ACTIVITIES

Software Engineer - AI Trainer

2026 - Present

LinkedIn

Remote

Software Engineer - AI Trainer

2024
