EDUCATION

M.C.S. Computer Science

Dec 2020

Arizona State University, Ira Fulton School of Engineering, Tempe, AZ

B.S. Computer Science (Cyber Security)

Dec 2019

Arizona State University, Ira Fulton School of Engineering, Tempe, AZ

Cumulative GPA: 3.61 | Major GPA: 3.78

Relevant Coursework:

Data Structures and Algorithms, Algorithm Design & Analysis, Theoretical Computer Science, Human and Computer Interaction

PROFESSIONAL EXPERIENCE

Intel – Software Engineering Intern

Sept 2019 – Present

- Assembling various scripts and processes to help automate daily tasks
- Calculating metrics using data from factory tools to ensure quality and reduce errors

American Express – Software Engineering Intern

June 2019 – August 2019

- Redesigned infrastructure for Platform Engineering team
- Introduced new tools such as Kubernetes to improve operations
- Administered 4 server nodes running unique applications & tools on a HA Kubernetes cluster
- Created automation scripts to take care of simple tasks that were previously manual
- Recorded the install process of Kubernetes and related tools, and updated existing documentation

Arizona State University – UGTA (Principles of Programming Languages)

Jan 2019 – May 2019

- Mentored students in advanced conceptual topics and critiqued C++ code

SKILLS

Coding Languages: Java, Python, C++, C, HTML, CSS
Bash, Scheme, Prolog

Software: Visual Studio, JetBrains Products, Azure

Operating Systems: Windows, Linux (Ubuntu, Mint, Cent OS, Red Hat)

Command Line Tools: GDB, Rappel, Netstat, Ipconfig

Big Data: Kubernetes, Docker, Elasticsearch, MapR

Soft Skills: Leadership, Communication, Self-motivated, Problem Solving, Conflict Management, Innovation

Other: Git, Scrum/Agile Development, Amazon Web Services, Pwntools, Opencv

ACADEMIC PROJECTS

Capstone Project | Team Project: General Dynamics HMI Capstone

Fall 2019

- Operating in a team of 5 using Agile Development with General Dynamics
- Analyzing Linux HMI frameworks to fabricate a GUI for a classified communication device

Capstone Project | Team Project: Construction Simulator in AR

Spring 2019

- Developed in C# using Unity and Microsoft HoloLens to help students simulate construction projects

Information Assurance | Individual Project: Security Policy

Fall 2018

- Implemented a dual authentication security policy in C++
- Devised a functional model to represent a house with a restrictive security policy

Intro to Software Engineering | Team Project: File Formatter

Spring 2018

- Team Leader in charge of project success and member participation
- Produced GUI components using java as well as the character per line and full justify functionalities

PERSONAL PROJECTS

Online Portfolio | Personal Website

Fall 2019 – Present

- Designing a website using HTML5, and CSS
- Managing an AWS EC2 instance and deploying Apache on Ubuntu 18.0.4 to host domain

Device Security | OpenCV Python Project

Fall 2019 – Present

- Exploring ML Library, OpenCV, to use face recognition to secure personal devices

ACTIVITIES

National Society of Black Engineers | Corporate Liaison

Fall 2018 – Present

- Arranged sponsorships with large companies and organized meetings for the general body
